SUMMARY

Frontend engineer with over **5 years** of experience in building scalable and accessible web applications. Proficient in **Angular, Typescript, NgRx, Javascript, CSS, HTML**, and experienced in **React**. Recognized for delivering maintainable, reusable components, debugging complex issues, and improving application performance. Skilled at working with cross-functional teams and incorporating design systems to improve user experiences.

EXPERIENCE

Frontend Engineer, Securly — San Jose, California Feb 2019 - Dec 2024

- Spearheaded **migration of web application from Angular version 7 to 13**, achieving substantial reductions in build time by up to 88% and bundle size by 12%
- Developed a **data visualization dashboard** for Securly Classroom, providing schools with key usage insights and reducing support requests by 30%
- Collaborated with designers, product managers, and backend team to ensure timely development and successful release of 50+ new features across 3 Securly products, **improving product performance** and user experience
- Designed and implemented over 30 reusable components and contributed to the **design system** documentation to ensure efficient and consistent experience across products
- Debugged and resolved 200+ critical bugs, improving application quality and stability by 50%, leading to smoother experiences
- **Managed GitHub codebase** and provided support for 5-member team in navigating Git workflow
- Introduced PR checklists to standardize code reviews, resulting in a 25% reduction in errors for new team members, higher code quality, and faster code reviews

Software Development Intern, Securly — San Jose, California Jun 2018 - Dec 2018

- **Enhanced web accessibility by 80%** on the company website by adhering strictly to WCAG guidelines, resulting in a more inclusive and user-friendly experience
- Engineered 10+ responsive and accessible landing pages, ensuring flawless functionality and a consistent user experience across all major browsers and devices
- Designed and implemented a progressive web application prototype, showcasing a 30% improvement in load speed and enhanced offline functionality, demonstrating potential for improved user experience and performance

CERTIFICATIONS

- Micro-frontend with React, Udemy
- FrontendExpert (React), AlgoExpert
- GraphQL with React, Udemy
- React Design Patterns, Udemy

EDUCATION

San Jose State University, California — **BS in Computer Science**, 2018

SKILLS
